PROJECT MANAGEMENT

WE USE INNOVATIVE SOLUTIONS TO MEET SPECIFIC BRIEFS AND REQUIREMENTS – ALL WITHIN YOUR AGREED TIMEFRAME AND BUDGET.

Our Project Management Team has extensive knowledge to strategically assist in all aspects of a project, including site choice, holistic design elements, workflow efficiency and stakeholder expectations.

Your focus can be concentrated on your patients, as we manage all or part of the project, reducing the demands on your time and completing the job to your exacting standards. We are able to do this through:

- » Contract management
- » Strategic planning
- » Site establishment
- » Construction management and supervision
- » Tender processes
- » Staffing and Contractor coordination
- » Environmental evaluations
- » Quality processes
- » Managing construction to your brief

For a project to consistently meet its targets, you need two-way communication that is open and honest, internally and externally. We establish regular feedback mechanisms for supervisors to report on the progress of each project.

Risks are identified early in the process and allocated to the best person to manage and mitigate. Strategies are then developed and implemented by all responsible parties to eliminate or minimise the effect of a risk and the likelihood of a risk event occurring.

These processes enable accurate status assessment of each project, so we can make any necessary adjustments to ensure completion to the satisfaction of all parties.
