**REFERENCE: BUILDING SOLUTIONS**

Between November 2013 and April 2014, Building Solutions completed the construction works for BP Cannington Tank Replacement project. Building Solutions acted as the Principal contractor, managing numerous subcontractors and coordinating on site works. Key activities included removal of existing steel wall tanks, associated remediation works, installation of new fibreglass tanks and fuel system (motor spirit and diesel), and dismantling and reinstallation of canopy.

Building Solutions managed safety appropriately on site, aligning with BP requirements where necessary and self-managing works appropriately under legislated Principal Contractor requirements. Building Solutions cooperated well with BP in regards to safety audits, regular on site safety inspections and discussions and requests for ongoing schedule and progress reporting.

As Project Manager, I appreciated Building Solutions' drive to complete all works to BP's satisfaction and pro-active responses to ad hoc site and project issues. It's personnel were responsive, accommodating and professional, and I would be pleased to have the opportunity to work with them again in the future.

Yours sincerely

**Kathy Bond**
