TO WHOM IT MAY CONCERN

Marocchi Engineering Group were engaged to carry out architectural services on the Ausdrill Ltd Project at Gauge Circuit in Canning Vale, organise the competitive tender process between Builders and conduct Superintendent duties during the construction phase.

This \$6,000,000 project has become the flagship location for the Manufacturing Division of the Ausdrill Ltd Group and the selection of the Builder has been one of the critical factors in this success.

The tender was awarded to Building Solutions (Aust) Pty Ltd and during this construction process we again experienced this companies ability to be well organised, committed to action, responsive to instructions in a timely manner and accommodating in completing over thirty client requested variations to the project.

The building has been completed within budget and time parameters and the quality of construction has been of a high standard. The client has been very pleased with the outcome and I believe the Managing Director of the Group – Ron Sayers, has written a letter of commendation for you.

Our organisation has been associated on various Institutional and Commercial projects ranging in value from \$500,000 to \$6,000,000 with Building Solutions (Aust) Pty Ltd since 2006 and the hands on professionalism of Marcus and David has always been a factor in us choosing them to be part of selected Tenders.

We are happy to work with Building Solutions on future projects and can recommend them as builders who provide a flexible and personalised service to their clients whilst producing a quality product. Well done.

Yours sincerely

Nicholas Spartalis
