TESTIMONIAL - OXFORD DAY SURGERY BUILDING WORKS

It is with pleasure that I write this testimonial for Building Solutions.

On completion of the work it was necessary to the State Health Department (LSRU Unit) inspect the premises before the license to operate the business could be issued. This group inspects businesses like ours to ensure they meet the high standards before they grant the approval.

I was very relieved to be told at the end of this inspection that we met all of the criteria at the first attempt, which is unusual. Furthermore, I was happy to hear their positive comments, amongst others, which was *‘The work carried out on this facility is of a very high standard, Building Solutions are to be congratulated for their efforts, well done’*.

It is these observations and comments from the State Health Department which reinforced my experience I had with Building Solutions, which is a professional and committed team to work with. Thank you Building Solutions for your efforts on my project, it was truly appreciated.

Sincerely,

DR Carl Vinciullo
